A awareness program is a program that informs a state or community about a problem, in this case informing people about believing each other.

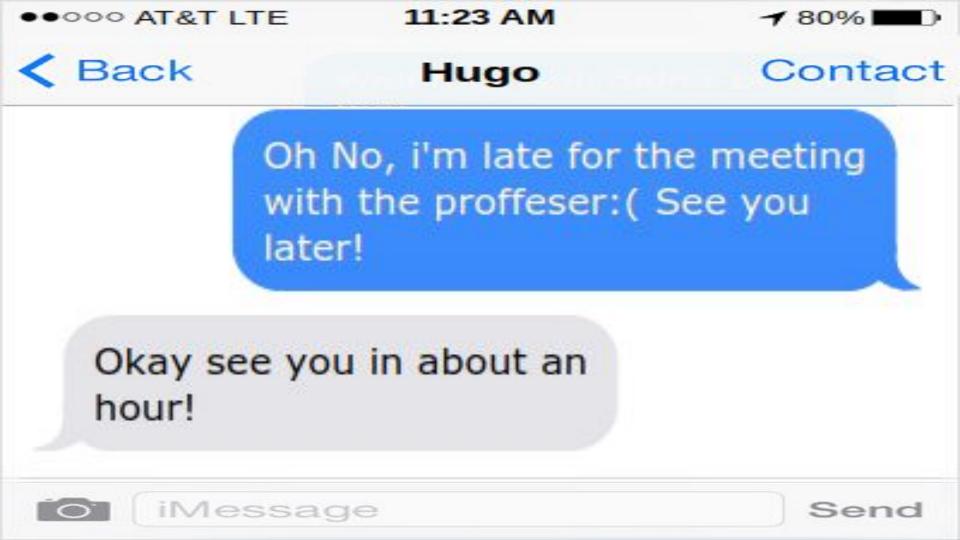

Well, I think I've heard of that before!

No never mind, I think I was thinking of something else *wink* *wink*.

Well, I was thinking about it when you were gone with the proffesser, and how we could do so many things with the awareness program, and for you the school club and how it would be fun and helpful at the same time, but then it popped into my head; How would we start the awareness program and the school club?

Well, first of all, If you hadn't told me I would have been stumped when the time came, and to answer your question you could make a website and posters to advertise your awareness program and I could ask if I could put a link to it on my school website, maybe?
